

# EURMASK® UNO

**Model: Half mask with one filter      Code 7354**

**EURMASK® UNO** is a one-size-fits-all half mask, in compliance with European standards EN140:1998 and in accordance with directive 89/686/EEC (DPI), with a threaded connection, suitable for the protection against fine and gross dusts. It is used in woodworking, marble work, paint stripping, grinding, and DIY in general.

Thanks to a soft edge, it fits snugly to the face, while a rigid connector supports the filter. The air inhaled through the filter and the inhalation valve reaches, purified, the interior of the half mask. The exhaled air is discharged to the outside via the exhalation valve.

**EURMASK® UNO** can be used in combination with filter **EURFILTER®** 7364 P2 R for gross dusts, and **EURFILTER®** code 7365 P3R for fine dusts.

The filters can be combined with special pre-filters to preserve it from clogging, when used in very dusty environments, thus extending the expected lifetime of the filter.
